Kitchen Measuring Worksheet

Everything a cabinetmaker needs to price your kitchen. Rough numbers are fine to start.

Crafted Cabinetry
craftedcabinet.com

You'll need

- ☐ 25-foot tape measure
- ☐ A long level
- ☐ Pencil and this sheet
- ☐ A second person
- ☐ Your phone camera

In this order

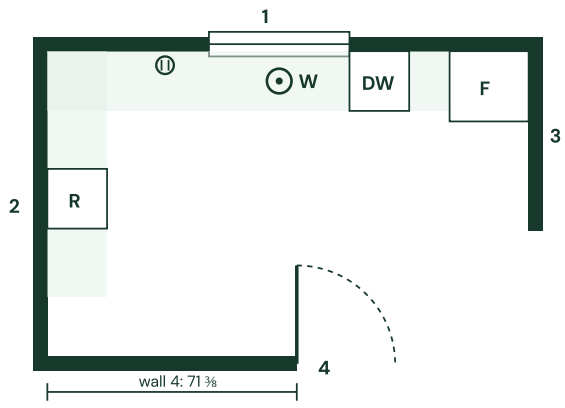
1. Sketch the room on page 2, using the symbols below. Number each wall.
2. Measure each wall corner to corner at **3 heights**. Keep the smallest.
3. Measure the ceiling in several places. The lowest one counts.
4. Windows and doors: measure to the **outside of the trim**, not the opening.
5. Plumbing, outlets, vents: measure to the **center**, from the same corner.
6. Appliances: write the model numbers. Don't measure the old ones.
7. Check corners for square (3-4-5) and walls for plumb.
8. Photograph each wall straight on, and the room from each corner.

Symbols for your sketch

Wall	Window	Door + swing
Opening (no door)	W Sink drain / water	G Gas line
Outlet	$ Switch	Vent / register
Soffit / beam overhead	R Appliance	96 ⅛ Measure line

Appliance letters: R range, F fridge, DW dishwasher, O wall oven, M microwave, H hood. Number each wall 1, 2, 3…

Example



Walls numbered 1–3, window over the sink on wall 1, range on wall 2, fridge at the end of wall 1, door swinging in on wall 4.

Shading shows where cabinets go. It doesn't need to be to scale: the numbers on page 3 do the work.

Done? Send it over.

Snap a photo of this sheet and your wall photos.

Sketch the room

Bird's-eye view. Use the symbols from page 1.

Each square = 1 ft (or any scale)

Measurements

Crafted Cabinetry
All in inches, to the nearest 1/16"

Walls

Wall #	Near floor	Counter height	Near ceiling	Smallest	Corner measured from
1					
2					
3					
4					

Ceiling height

Wall #	Reading 1	Reading 2	Reading 3	Lowest	Soffit / beam? (height × depth, where)

Windows and doors

W / D	Wall #	Corner to trim edge	Width incl. trim	Floor to bottom of trim	Floor to top of trim	Door swings

Plumbing, gas, electrical, vents (to the center)

Item	Wall #	From corner	From floor	Moving it?
Sink drain				
Water supplies				
Gas line				
Hood vent				
Outlets / switches				

Appliances (model numbers, not sizes)

Appliance	Brand and model #	Panel-ready?	Appliance	Brand and model #	Panel-ready?
Range / cooktop			Dishwasher		
Fridge			Microwave		
Wall oven			Other		

Square and plumb

Corner (walls)	3-4-5 diagonal reads	Wall #	Leans in or out? Where?	Floor high point

Send it, even if it's rough.
Rough numbers are enough to start the design. Final measurements are confirmed before anything is cut.
